

AirWaves

WHOLE-HOME AIR PURIFICATION SYSTEM

Benefits

- Freshens air and eliminates odors
- Whole-home coverage
- Safe, silent, and effective
- Operates automatically with HVAC fan
- Out-of-site inside the ventilation system
- More efficient than a 60-watt bulb
- Easy to maintain

Features

- Adjustable output
- In-duct installation and operation
- Combined strength of O₃ and UV
- Linked to HVAC operating system
- No moving parts

Whole-Home Air Purification System

AirWaves is a unique whole-home air purifying system that eliminates household odors and airborne microbes utilizing two of nature's strongest purifiers - ozone and ultraviolet light.

It is the combination of UV and ozone that makes AirWaves so effective. Although UV light is a powerful sterilizer on its own, it cannot be projected around corners and only decontaminates air as it passes through the light. Ozone flows freely throughout the duct-work to freshen air, destroy odor, and neutralize microorganisms wherever they are. It's this powerful combination that makes all the difference in providing complete protection throughout the home.

Unlike room air fresheners that only treat the air in one room at a time, AirWaves works with your existing HVAC system to treat all the rooms in your home simultaneously. The system is installed in the supply air duct and tied into the heating control system. Whenever the heating or air conditioning fan is on, so is AirWaves.

BETTER AIR FOR YOUR WHOLE-HOME!

1

Easy, professional installation in your main air duct

2

Safely operates on low voltage AC power

AirWaves Specifications

DIMENSIONS	EXPOSED SIZE (OUTSIDE OF DUCT)	MINIMUM DUCT DEPTH	VOLTAGE	TOTAL POWER CONSUMPTION	SHIPPING WEIGHT	SHIPPING BOX
